## SESSION SUMMARY

### AFTERNOON

SITE I (city in China, at the foot of towering limestone formations)

.....vertical up, very high, across..... vertical up, hard, rugged, natural (mountain)..... across, flat, across, semi-hard (land)..... across, flat, across, liquid (water)..... across, vertical angle up, right angle across (structure)..... Mountain/land/water/structure interface.

NOTE: The "structure" portion of the ideogram appeared while trying to write the letter "A"..... just couldn't regain control of the pen..... rather an interesting experience.

SITE II (Volcanic mountain on the Lanouy Islands)

.....vertical up, very high, rugged, hard, natural with colors of grays (mountain)..... feeling of down, down, down, down, in rapid succession, something radiating upward..... energy, warmth..... vertical down, vertical up, cool, hard, gray on either side of ideogram..... warm, orange, yellows and browns with something circular in between..... Mountain/Energy interface.... a mountain of energy.

OVERALL..... feel good about both sites.... although most impressions/perceptions remain very subtle, they are getting easier to distinguish as confidence builds.
